# HELLAS SAT 4

E-O SCROLL DOWN

Since its launch in 2019, Hellas Sat 4 has been tending to your communication needs from the orbital slot 39° East, providing exceptional coverage over Europe, the Middle East, and Southern Africa. Its cutting-edge technology and the possibility of in-orbit backup have strengthened our existing coverage network and enabled us to provide even more reliable solutions and services to broadcasters, enterprises, and government agencies.
