

APSTAR-6D @ 134°East

Satellite Information:

Life Time :	≥15 years	Capacity :	>50 Gbps
Orbital Slot :	134°E	User Beams :	90 Beams
Frequency :	Ku for user beams, Ka for gateways		
Peak EIRP :	65.8 dBW	Peak G/T :	19.1 dB/K
Features:	• Performance enhancement for key air and sea traffic routes and areas. • Power and bandwidth flexible allocation.		

Gateway Information:

- Kuala Lumpur, Perth, Beijing, Shenzhen, Xi'an, Hong Kong
- 13.2m Ka-band Antennas with mono-pulse tracking
- Geographical diversity design in tropical area
- IDC and IP transit capabilities
- Open architecture catering to customers' need
