

SATELLITE EUTELSAT 174A

NEW INTER-CONNECTIVITY FOR ASIA-PACIFIC AT 174° EAST

From its location in geostationary orbit at 174° East, the EUTELSAT 174A satellite offers coverage over the Asia Pacific region via a payload of extensive Ku-band transponders.

Leveraging its comprehensive coverage and high-bandwidth capability, the EUTELSAT 174A satellite offers a broad range of telecom and maritime services, as well as video distribution and professional video services.

Providing full coverage of Asian seas and much of the Pacific Ocean, it is the ideal choice for the maritime industry.

With coverage from Australia and New Zealand up to Japan, its regionally focused beams allow numerous interconnectivity possibilities across the Asia Pacific.

The satellite previously operated at 172° East under the brand name EUTELSAT 172A.
