

DUAL BAND CAPACITY FOR DATA AND PROFESSIONAL MARKETS

C-band Global Downlink Coverage

KEY MARKETS

- Europe
- Middle East
- Africa
- Indian Ocean

KEY SERVICES

- Professional Video
- Broadband
- Business networks
- Telecommunications
- Mobile TV

SATELLITE

Satellite Manufacturer

Alcatel Alenia Space

Launch Date

03/04/2009

Projected Lifetime

15 years

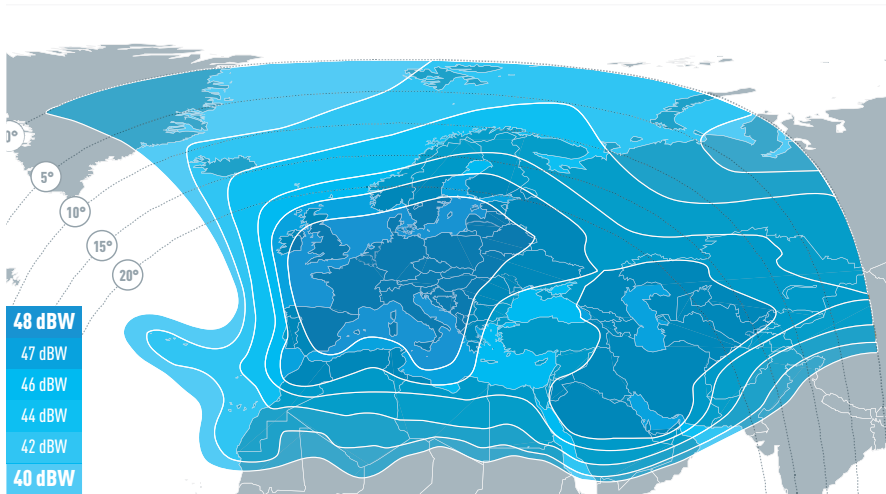

Orbital Position

10 degrees East

Frequencies

Ku-band, C-band

Ku-band Widebeam Downlink Coverage

Ku-band Africa Downlink Coverage

Ku and C-band capacity at a key location

EUTELSAT 10A carries a powerful payload of Ku-band capacity, while also boosting C-band capacity available through Eutelsat's fleet for services across Africa. The satellite is located at 10 degrees East, one of Eutelsat's long-standing orbital locations and a key position for data and professional video networks. Services have been continuously provided at this location since 1987.

The Ku-band payload on EUTELSAT 10A offers an enhanced Widebeam footprint serving Europe, North Africa and the Middle East. A second Ku-band beam serves southern Africa and Indian Ocean islands, and enables connectivity between Africa and Europe. The C-band payload provides pan-African coverage, extending to India and parts of Asia as well as Latin America, for broadband and telecommunications services.
