

A KEY ORBITAL LOCATION FOR REGIONAL MARKETS

Ku-band Europe A Downlink Coverage

Ku-band Europe B Downlink Coverage

KEY MARKETS

- Turkey and Turkish-speaking markets
- Europe
- Middle East
- Africa
- Indian Ocean

KEY SERVICES

- DTH broadcasting
- Corporate networks
- Video distribution to small dishes
- Contribution services
- Voice over IP
- IP broadband access
- Tele-medicine and e-learning

SATELLITE

Satellite Manufacturer

Thales Alenia Space

Launch Date

14/05/2013

Projected Lifetime

15 years

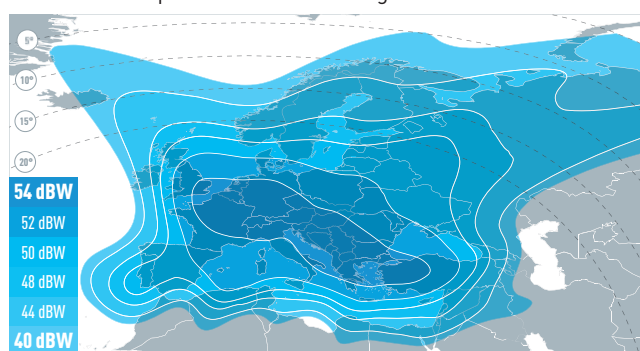

Orbital Position

7 degrees East

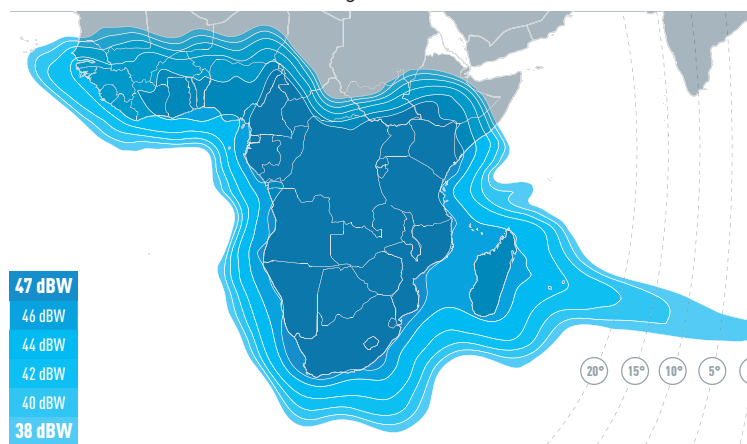

Frequencies

Ku-band, Ka-band

Ka-band Europe C Downlink Coverage

Ku-band Africa Downlink Coverage

Ku-band South East Africa Downlink Coverage

High-power capacity for DTH applications

EUTELSAT 7B is co-located with the EUTELSAT 7A satellite at this new orbital hotspot for customers in South-East Europe, Turkey, the Middle East, Sub-Saharan Africa and the Indian Ocean.

These additional resources at 7° East have increased in-orbit security, while the very high power available on EUTELSAT 7B makes it particularly suitable for Direct-to-Home (DTH) applications.

7° East is a key orbital position for regional TV channels. It has seen important growth in Turkey and the Middle East with over 8 million homes, and is a growing neighbourhood for Farsi-speaking audiences.

It has also become a new DTH hotspot for Sub-Saharan Africa and a key pay-TV neighbourhood for Eastern Africa with some of the fastest growth rates in the region.

EUTELSAT 7B features five coverage zones: one high-power beam over Europe; two beams serving Europe, North Africa and the Middle East; and two beams covering Sub-Saharan Africa and the Indian Ocean.

Built by Thales Alenia Space and based on the Spacebus 4000 platform, EUTELSAT 7B was launched in May 2013.
