

PAN-AMERICAN CAPACITY IN C AND Ku-BAND*

C-band Pan-American Downlink Coverage

KEY MARKETS

- North America
- South America

KEY SERVICES

- Occasional Use services
- High-speed data
- Mobility
- Oil & Gas

SATELLITE

Satellite Manufacturer

Hughes Space and Communications

Projected lifetime

> 15 years (Launched December, 1998)

Orbital position

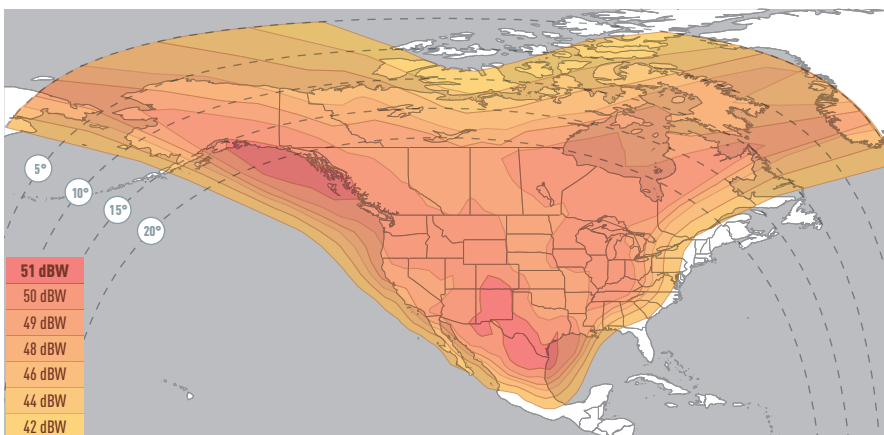

114.9 degrees West

Frequencies

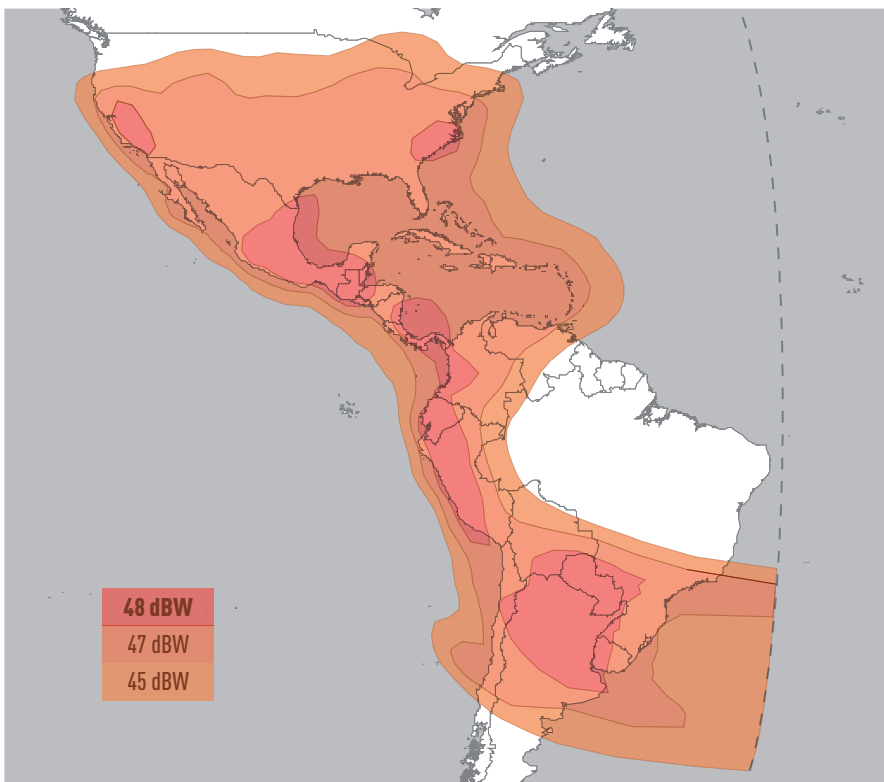

C-band, Ku-band

* Inclined Orbit Operations (IOO)

Ku-band 1 North American Dink Coverage

Ku-band 2 Pan-American Dink Coverage

Double band capacity for professional applications

Located at 114.9 degrees West, the EUTELSAT 115 West A satellite offers hemi coverage in C and Ku-band for the Americas. EUTELSAT 115 West A provides a compelling alternative for occasional use services, voice and high speed data communications from fixed to maritime and airborne networks. This satellite is also a good option for support networks and services with high traffic from few points.

The satellite operates in inclined orbit.
