ChinaSat 6A

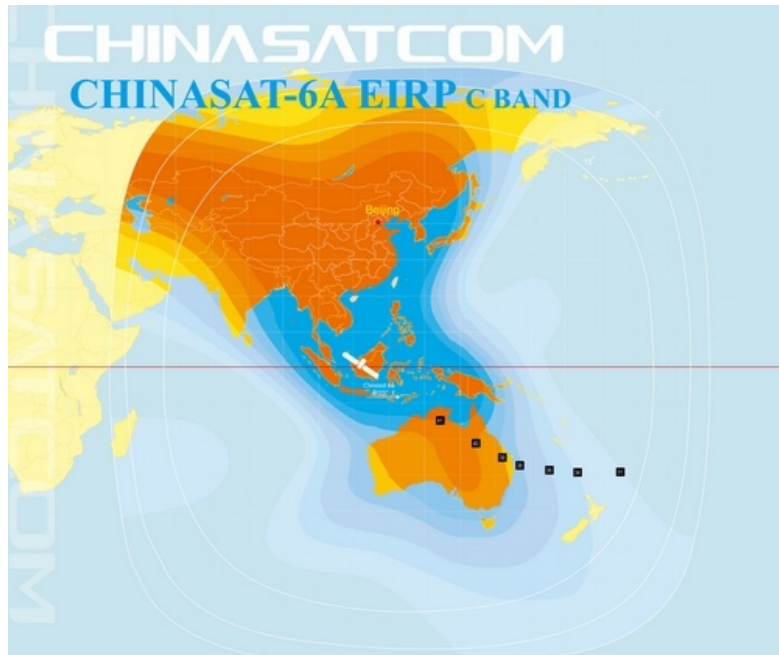

Updated: 2015-05-27 Source: China Satellite Communications Co.Ltd.

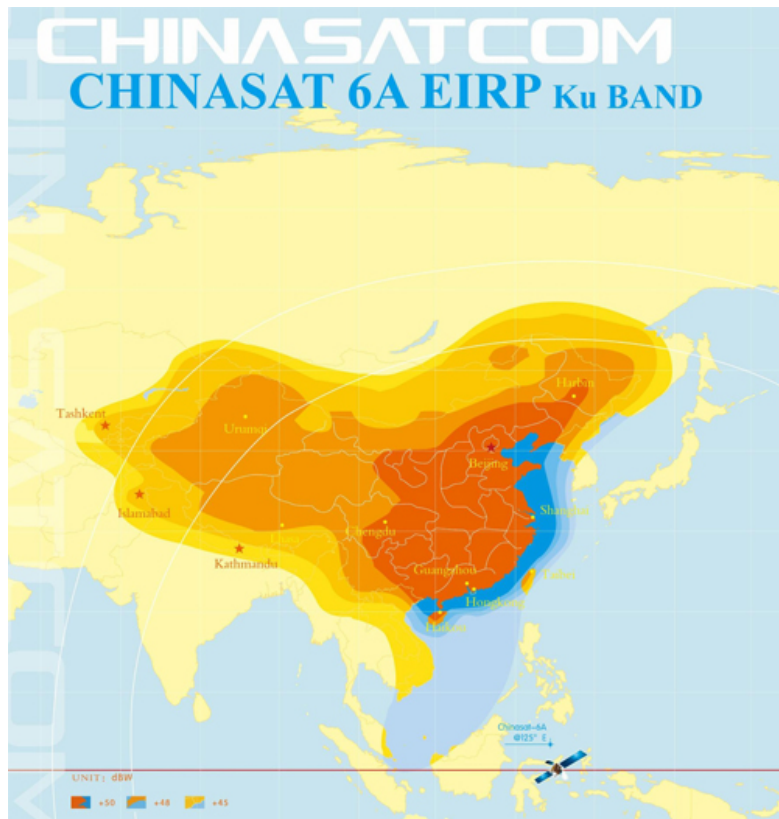

ChinaSat 6A(SinoSat-6)

- Manufacturer: China Academy of Space Technology
- Launch Time: September 5, 2010
- Bus: DFH-4
- Polarization: Linear Polarization
- Orbit Slot: 125°E
- Coverage: China and Asia-pacific regions

ChinaSat 6A was launched on September 5, 2010 onboard a Chinese LM-3B launch vehicle and positioned at the orbital slot of 125°E. It provides commercial communications services with twenty-four C-band, eighth Ku-band transponders, and also provides communications services with one S-band transponder. ChinaSat 6A covers the overall territory of China, Middle East and other Asia Pacific regions. Subsequent to ChinaSat 5C and ChinaSat 6B, ChinaSat 6A is another high-quality satellite that fully meets the demands for China's radio and TV broadcasting transmissions.
