

## Model 1138 1.2m QD Quick Deploy Antenna

Quick Deploy

The VertexRSI lightweight 1.2-meter Quick Deploy antennas are designed for worldwide transmit and receive operation in C, X, Ku and Ka-band. These portable antennas consist of Precision Compression Molded reflectors and a compact aluminum pedestal. This results in a durable antenna with superior stiffness and high performance under wind loading conditions.

The unique shape and the accurate reflector surface provide good sidelobe and cross-polarization performance. The antenna system is a Series 1138 and the reflector consists of a two-segment SMC compression molded assembly. Repeatability is maintained with precision registration of the reflector segments and the feed support structure.

The 1.2-meter antenna, including the feed, is packaged in three portable cases.

## **Features**

- · Precision compression molded offset reflector
- · Compact galvanized steel pedestal
- · Transport cases included
- Two-person assembly in less than 5 minutes
- · Captive hardware/fasteners
- · No tools required
- · Quick adjust positioner

## **Options**

- · Paint/finishes
- · Case upgrades
- · Multiple feeds
  - C, X, Ku and Ka-band

## **Technical Specifications**
